Florida Peninsula Insurance Company is pleased to announce we have eased our underwriting process, allowing our agency force, the ability to bind new business more efficiently and easily.

Beginning July 7, 2015, the following changes will become effective on all new business:

- All Burglar, Fire Alarm and Sprinkler Certificates, as well as Wind Mitigation Forms may now be retained in your agency files. Should your agency wish to continue uploading such forms to Agency Link, you may do so at your discretion.
- 4 Point Inspections will now be required on all homes 40 years and older.
- Should repairs be needed during the inspection process, we will allow most
repairs to be done prior to the policy's next renewal. In extreme cases, where immediate action is required, we will extend 40 days to complete necessary repairs.

- Interior inspections will be required on high value homes, homes where sinkhole coverage is requested, on homes 50 years and older.

By streamlining our underwriting processes, we believe your agency will benefit from increased production, and our policyholders will experience the fast, fair and friendly service we are committed to providing.

Should you or your agency staff, have additional questions concerning these changes, please do not hesitate to contact your Sales Development Manager, or our Customer Service Department at: 877-229-2244 for assistance.
